Clinical management of survivors of rape: developing protocols for use with refugees and internally displaced persons

www.who.int/reproductive-health/publications/clinical_mngt_survivors_of_rape

Jointly developed by the World Health Organisation, UNFPA, UNHCR and the International Committee of the Red Cross, the guide has been field tested by a range of humanitarian agencies. Intended for use by qualified healthcare providers, it includes detailed guidance on the clinical management of women, men and children who have been raped. UNHCR and UNFPA have trained over 300 medical staff working in GBV programmes in some 20 countries with refugee or other emergency situations on the application of this guidance. Workshops are ongoing and the training modules are available to the people who have been trained, so that they can conduct their own workshop for their colleagues.
